SUMMARY

Aspiring Full Stack and App Developer with a strong interest in web development, mobile application development, and emerging technologies. Possesses foundational knowledge in programming, web technologies, and app development, with a growing interest in Artificial Intelligence and Machine Learning. Eager to learn new technologies, develop practical skills, and contribute to innovative and user-focused technology solutions.

EDUCATION

Ramco Institute of Technology 2023 – 2027
B.Tech Computer Science and Business Systems, CGPA: 7.88

INTERNSHIP EXPERIENCE

Full Stack Development Intern – Digital Grasp Jun 2025 – Jul 2025
Developed dynamic web applications using HTML, CSS, JavaScript, Python, and Java. Integrated REST APIs with SQL databases to support backend functionality and data handling. Collaborated with team members using Git and improved code efficiency through optimization.

PROJECTS

PPE Detection System using AI/ML – Ramco Mills 2026
Developed an AI-based system to detect whether workers are wearing personal protective equipment (PPE) such as helmets in an industrial environment. Used machine learning and computer vision techniques to monitor safety compliance.

Mandibular Trauma Guidance and Decision Support Mobile Application (In Progress) 2026
Developing a mobile application for young maxillofacial surgeons to assist in understanding mandibular fracture patterns and effective management methods. Implementing features for fracture classification, clinical findings analysis, and treatment guidance based on doctor-entered inputs.

CERTIFICATIONS

- UiPath Automation Business Analyst Training Program
- Foundations: Data, Data, Everywhere – Google (Coursera)
- Git & GitHub – Simplilearn Certification

SKILLS

Programming: Python, Java,Dart

App Development: Flutter, Django Backend,FireBase

UI/UX Design: Figma

DataBase:SQL,DataBase Fundamentals

Web Development: HTML, CSS, JavaScript,ReactJs,Node.js,REST API

Technologies & Tools: Artificial Intelligence, Machine Learning, Git, VS Code
